## CS107S Series

Line Voltage PIR Ceiling Sensor

CS107S.A0

### Description

The CS107S is a line-voltage PIR occupancy/vacancy sensor with an integrated photocell that provides an adjustable ambient light "Hold-OFF" feature. If ambient light exceeds a programmed threshold, the sensor will keep lights off, even when occupancy is detected. Commissioning via the Keilton+autani app allows the sensor to turn a load on and hold it on while it detects motion. The CS107S works seamlessly together with other wireless devices in the Keilton+autani system.

### Features

- 120-277VAC input
- 600 sq ft room coverage with PIR sensing technology
- Wireless Bluetooth connection to other Keilton+autani devices
- Configurable for occupancy or vacancy mode
